Walter's
PFLEGEHAND®

innovation in personal hygiene

0117 subject to modifications

Wellness and care for the whole body

In our daily life, taking care of the body is very important but it is not always manageable.

Therefore, we, at **Walter's PFLEGEHAND®**, have developed an elaborate system which makes the daily body care a lot easier for you.

Now you are able to wash your body and apply lotion without foreign help.

For that purpose, you can choose aesthetically pleasing and formfitting universal wooden handles according to your needs. These handles can be ordered in different sizes (16.54 to 22.44 in long) and the special 'curve form'. All handles are treated with Bio-Natur-Hartöl to ensure their water-resistance and keep the naturalness of the surface. This "extended arm" allows the trouble-free achievement of all body parts, especially the back.

However, the chief attraction is the convenient changing system:

using velcro fastening, all nursing components can easily be switched out and affixed to the universal wooden handles. Another **unique** feature is the skin-neutral, moisture-proof nursing cushion which are made from a special foil.

Body lotions and medical ointment can be applied in small dosages without a problem.

The corrugated surface allows lotions, unguents and ointments to stick to the cushion and makes you feel a soft and pleasant massage effect on your skin while applying the lotion.

The nursing components:

- **Nursing cushions**
Available in the original form or the V formation. It is innovatively and proves itself for lotions and medical products/ointments
- **Sponge**
for washing and easy massaging
- **Brush**
with clinically clean nylon bristles. Can be used as dry brush or wet brush, also in the sauna
- **Foot / Toe Cleaner**
for easily cleaning, drying and putting on lotion between your toes
- **Massage scooter**
can be used together with the handle or the hold tape, as well as put on the floor and used to massage your soles
- **Callus file**
consists of a fine and a rough surface which is replaceable by a double-sided adhesive tape
- **Mirror**
in connection with the universal wooden handle, is suited to control your soles without strange assistance. Especially suitable for diabetics
- **Adjustable hold tape**
it allows you to carry the complete nursing system in your hand without using the universal wooden handle
- **Wall fixture**
It is possible to attach a wall fixture without having to drill. Once attached, all nursing components can be kept handy

The desired ointment, oil, lotion or creme to put on the nursing cushion- no troublesome filling over, filling in or nothing of the kind.

- Predicate »**Recommendable**«

Walter's PFLEGEHAND® has been submitted between extensive tests and has received the predicate »**Recommendable**«.
